

# BIODIVERSITY FRIENDLY FUTURES

For over a decade, **Biodiversity Friendly Futures** has shown that livelihoods and conservation can thrive together. Rooted in traditions like guassa grass cultivation and highland honey production, it restores land and sustains incomes while strengthening community governance. By empowering women, youth, and elders, this project builds inclusive resilience - securing Afroalpine futures for people and wolves.

Planting native Guassa grass

**Donate**

## SUPPORT THIS PROJECT TO:

- Help *guassa* and honey cooperatives with training and start-up resources
- Restore degraded Afroalpine land through community planting
- Protect Erica forests through honey
- Enable communities to monitor their biodiversity
- Fund inclusive council meetings
- Include women, youth, elders, and religious leaders in conservation

***30 years of conserving Ethiopian wolves:  
help us build resilience for the next decade***
