

For 30 years, EWCP has confronted the greatest threat to Ethiopian wolves: disease from domestic dogs. Through **One Health**, we combine vaccination, surveillance, and community action to protect wolves, livestock, and people. This anniversary marks our success reducing rabies and canine distemper risks. Our vision is to eliminate diseases from wolf ranges.

EWCP Vet Team Leader, Muktar Abute, with a vaccinated Ethiopian wolf for release

ethiopianwolf.org

SUPPORT THIS PROJECT TO:

- Protect wolves with preventive oral vaccines
- Advocate responsible dog-ownership in the Highlands
- Refine early-warning systems for disease
- Foster the next generation of Ethiopian vets
- Maximise vaccination efficiency
- Unite health, livestock and environmental sectors to eliminate rabies.

***30 years of conserving Ethiopian wolves:
help us build resilience for the next decade***
